

THE
OASIS

BY EMAAR

An aerial, dusk-time rendering of a modern waterfront residential development. The scene features numerous contemporary, multi-story houses with light-colored facades and flat roofs, arranged in a grid-like pattern. Each house is surrounded by lush greenery, including palm trees and other tropical plants. A prominent feature is a large, winding canal or waterway that flows through the center of the development, with several smaller pools and ponds interspersed among the buildings. The water reflects the warm, golden light of the setting sun. In the foreground, a large, curved waterway curves around a central cluster of houses. The overall atmosphere is serene and luxurious, emphasizing the integration of modern architecture with nature.

Serene Waterfront Living Where Luxury & Nature Unite
